Education

University of California San Diego

San Diego, CA

Master of Science in Computer Science (GPA: 4.0/4.0)

Sep 2022 - Mar 2024

Graduate Teaching Assistant: AI - Probabilistic Reasoning & Decision Making, ML - Learning Algorithms (~300 students)

Coursework: Graduate Networked Systems, Algorithm Design & Analysis, Software Engineering, Search & Optimization, Recommender Systems & Web Mining, Unsupervised Learning, Training Generative Models, Stat NLP, Biomedical NLP

PSG College of Technology, Anna University

Coimbatore, India

Bachelor of Engineering in Robotics and Automation (GPA: 9.91/10.0)

Jul 2016 - Sep 2020

University Rank: 1 (Best Outgoing Student, Gold Medalist)

Technical Skills

Languages: JavaScript, Python, Golang, TypeScript, HTML and CSS, SQL, JAVA, C, C++, PowerShell
Frameworks: Node.js, React, Scikit, Tensorflow, Redux, REST, MongoDB, Keras, Pandas, PyTorch, D3.js
Tools: GIT, Docker, JIRA, gRPC, Jupyter, ELK, Postman, Confluence, Tableau, Kubernetes, Jest
Platforms: Windows, Linux, AWS Lambda, Google Cloud Run, IIS Web Server

Professional Experience

Dolby Laboratories

San Francisco, CA

Cloud Processing Engineer Intern

Jun 2023 - Sep 2023

- Responsibilities: Cloud Research, Software Profiling, Deep Learning, ML Engineering, Serverless Compute
- Developed a system that automatically identifies the most cost and performance effective parameters for serverless compute of real-world cloud usage scenarios on AWS Lambda and GCP Cloud Run Service.
- Conducted research on optimizing critical cloud compute platform settings to maximize performance while ensuring low operational costs by strategically analyzing for patterns from profiled data.
- Designed and implemented an end-to-end ML engineering pipeline that includes data profiling using Node.js on AWS Lambda, automated model training in Python, and real-time predictions through a Node.js API.

Ramco Systems

Chennai, India

Software Engineer - New Initiatives (Early-Stage)

Nov 2020 - Jun 2022

- Responsibilities: Full Stack Development, API Integration, Distributed Systems, Data Science
- Led development of a semi-automated customer support system for creating tickets from the Ramco Core Software, improving fix generation for support teams.
- The system reduced overall the Service Level Agreement by 30%, improved customer self-service and is currently live for over 60 public cloud, private cloud and on-prem customers.
- Maintained and supported end-to-end development, testing, deployment, and support of the frontend and backend application while collaborating with the product manager, UX designer, and solution architect.
- Developed a module to dynamically suggest help content based on the Product Screen Context Details.
- Integrated system logs to elastic and designed Kibana dashboards to monitor performance & user metrics.
- Built 25+ and reviewed 40+ React UI components for the Ramco Low Code Platform.
- Designed a scheduler to sync time bookings of employees from JIRA and Wrike to the internal application.

Projects

File Storage Server Implementation | *Golang and gRPC*

- Implemented a scalable and fault tolerant file storage server application that syncs across multiple clients (like DropBox) using Consistent Hashing and RAFT consensus protocol.

Wordle Bot | *Python, Algorithms and Data Structures*

[Code](#) | [Report](#)

- Created an algorithmic system that utilized various heuristics to solve the online Wordle game in an average of only five guesses and an evaluation bot for validating the player bot.

Pathfinding and Maze Algorithms Visualizer | *React, Web Development and Graph Traversal*

[Project](#) | [Code](#)

- Built a react based static web page to visualize Path finding (Dijkstra's, A*, Bidirectional Greedy, Breadth-First) and Maze Generation Algorithms (Recursive Division, Vertical Division, Random Maze).
